

## **Addendum To Questions Take On Notice**

### **1 WRITTEN QUESTIONS FROM THE PUBLIC**

#### **16.1 D Frawley, Doncaster**

**Q1 What actions has the Council take towards encouraging the provision of car-sharing facilities and services within Manningham?**

*Since 2013, Council has approached numerous car sharing companies to explore introducing car sharing schemes with the municipality, in particular within the Doncaster Hill precinct. Until now, car sharing operators have expressed that their expansion to Manningham is not considered commercially viable.*

*However, given the recent increase in the number of developments within Doncaster Hill, Council acknowledges that the achievement of mode shift is a complex issue requiring a coordinated long term approach amongst government and private agencies. Actions to encourage mass behaviour changes to alternative modes of transport, including car sharing, are needed to increase the uptake of sustainable transport modes. As a result Council adopted the Doncaster Hill Mode Shift Plan, which aims to encourage a mode shift of 30% to sustainable transport modes.*

*A key objective of the Doncaster Hill Mode Shift Plan is to investigate the implementation of a car share scheme within Doncaster Hill, including appropriate locations for car share spaces. This action is a medium term action to be pursued in the next 3 -5 years, and subject to support by car share operators.*
